Amendment 9; Amendment 13; Amendment 14

Amendment 14 highlights citizens rights to be aided by the equal protection of the laws within the jurisdiction in which they reside. Cyber terrorism is a weakness for many Americans if not all that fall to the hands of assailants, bad men and women, and more. As such, the acceptance of porn as a cite although listed as World Wide Web, this claim and suit is within this countrys means to eradicate (to start, within this country) the visual acceptance of those that suffer long after, albeit intended for money or fame (at the time), discredits the haunting realism that human trafficking is a crime and unacceptable.

Amendment 9 is included to this complaint in connection to Amendment 14 in which all citizens deserve to be treated humanely and not exploited for their body because (if relevant at all) their consumption for money. This in turn, issues the 13<sup>th</sup> Amendment which is involuntary servitude of time (cyber) as it is kept as a file and processed worldwide. This indecent form of slavery was a moment of their need of life to survive for such a trade (money, if at all). This is against the Amendments as citizens' rights to be valued, protected, and saved.

I issue this suit in support of the country and all law makers (in truth all that are citizens within - all) to these specifically listed defendants because this defendant (CIA) is capable and has the means to provide its relief. Such a suit exists only as the authority and laws are defined as responsible, capable, and overseers of such citizens within; held responsible under oath as an ability to protect, serve, and deliver to justice. Humanity in whole, is the concept of our nation, therefore, this suit, in this section III. Basis For Jurisdiction, explains how the defendant acted under the color of law, (inaction, etc.).
